Reviewer General Comments and Suggestions (mandatory written feedback):

The theme of collaborative use of VR for home-buyers, users or investors is topical, but not very original.

A lot of what seems to be promised in the abstract is currently being applied. It is not clear if the study proposes certain novel applications and the objective status of the methodology (moderation and evaluation by the researcher) is questionable.

Some doubts, needs serious work...

Reviewer General Comments and Suggestions (mandatory written feedback):

The abstract reads well and the project is interesting. Good description of emerging technology applications for a novel use, but gear this more specifically to design communication through a clear description of the working methods. Be specific about the process of photo capture, and analysis, by whom, when, in what sequence, and how and why it may or may not be replicable in certain circumstances. Also consider a better title, start with VR...

Reviewer General Comments and Suggestions (mandatory written feedback):

- What specific topics did the researcher handle for focus groups? What are the specific research findings? → need to be more specific by briefly, but more clearly explaining the tools for the experiment & the number of participants, etc.
- Missing references, in-text citations, and an image label
- Need more background information and evidence
