Reviewer General Comments and Suggestions (mandatory written feedback):

The work is very interesting and demonstrates a lot of work and original content. It would be a very remarkable and high level scientific article. Unfortunately, it is not pertinent to the main conference objectives and does never refer to the topics addressed by the call.

Reviewer General Comments and Suggestions (mandatory written feedback):

Fascinating subject, rigorous research methods, clearly described ... and I know it could be related to the very broad list of conference topics, but I don't understand how it relates to "design communication." Perhaps the particular manner of study, through the diagrammatic analysis shown in the figures, will be the main thrust of the conference presentation?

Reviewer General Comments and Suggestions (mandatory written feedback):

- Highlight what makes this project unique given that there are similar projects done in the past
- Some more discussion on physical/virtual conference theme is needed
