Reviewer General Comments and Suggestions (mandatory written feedback):
This paper generally seems to follow the spirit of the conference theme. The abstract seems to cover well documented ground.

Questions 4, 5, 6, 8 seem more appropriate to a formal paper than an abstract.

Reviewer General Comments and Suggestions (mandatory written feedback):
The ability to simulate the environment proves to be indispensable to making good design decisions. As a project the research is likewise very exciting. The abstract needs to refined to define more specifically the focus of the paper, what about the research are you trying to highlight? There seem to be many good avenues, retool the text to capture particular aspects.
