The author was clear about the direction, methods and outcomes. Images would have helped. There was reference to research backup reading but no bibliography.

Reviewer General Comments and Suggestions (mandatory written feedback):

Good project, and an ok abstract. Recommend accept with minor revisions. The abstract needs more clear linkage from evidence to argument. Consider more comprehensive discussion of workflow in the full paper, and a clear description of methods and process, including specific references to how BIM can reframe or recenter design communications media at various stages of the process.
